I. Transactions.

	PAGE
Iwao IWAMURA: Biochemical Studies on "Miso", Fermented Soy-bean Paste. Part II.—Influence of Temperature upon the Ripening of "Miso".	1
Masakazu YAMADA: On the Alcoholic Fermentation of the Aminoacids. Part IV.—Decomposition of Glycocoll.	19
Masakazu YAMADA: On the Alcoholic Fermentation of the Aminoacids. Part V.—Decomposition of <i>d</i> - <i>l</i> -leucine by Saké Yeast.	21
Masakazu YAMADA: On the Alcoholic Fermentation of the Aminoacids. Part VI.—Decomposition of <i>d</i> -amino-normal-valeric acid by saké yeast.	22
Masakazu YAMADA: On the Alcoholic Fermentation of the Aminoacids. Part VII.—Decomposition of <i>d</i> - <i>l</i> -valine by saké yeast.	24
Masakazu YAMADA: On the Alcoholic Fermentation of Aminoacids. Part VIII.—Decomposition of glutaminic acid and asparagine by saké yeast.	26
Masakazu YAMADA: On the Glycerin Fraction in Saké.	28
Masakazu YAMADA: On the Variation of Sugar-content in Saké.	28
Sator OHDAKE and Teikichi YAMAGISHI: Oryzanin "Antineuritic Vitamin". IV.—On the Activity and Thermostability of Oryzanin Hydrochloride.	51
Toyosaku MINAKAWA: Studies on Amylosynthease. Part II.—Amylosynthease of rice.	62
Suttekiti MAKUYAMA: Antiscorbutic Activity of Ascorbic Acid isolated from Japanese Green Tea.	79
Suttekiti MAKUYAMA: Synthesis of Ascorbic Acid and Its Identity with Vitamin C.	87
Sator OHDAKE and Teikichi YAMAGISHI: Oryzanin "Antineuritic Vitamin". V.—On the Activity of Oryzanin Hydrochloride.	111
Tadashi HATANO: Effect of Feeding Vegetable Protein on Copulation and Fertilization in the Fowl.	126
Iwao IWAMURA: Biochemical Studies on "Miso", Fermented Soybean Paste. Part III.—On the Effect of Cystine upon the Nutritive Value of "Miso-protein" when fed to Albino Rats as a Supplement of rice.	128
Kotaro NISHIDA: Biochemical Studies on "Sotetsu" (<i>Cycas revoluta</i> Thunb.) Part V.—On the Chemical Constituents of "Sotetsu" pollen. I.	143
Sadayuki HAMANO: Physiologically Active Crystalline Esters of Vitamin A.	148
Yasuo IWASAKI: On the Mannitol-forming Bacteria Isolated from Sweet Potatoes (<i>Ipomoea edulis</i> , Makino).	159
Yasuo IWASAKI: On the Mannitol-forming Bacteria Isolated from Kaki-fruits (<i>Diospyros Kaki</i>).	164

II. Abstracts from Transactions published in Japanese.

No. 1. January.	Page	TAKAMIYA)	17
On the natural pigments of raw silk fibre of the domestic cocoon, Part IX.—Several pigments of yellow, green and white cocoons, (M. OKU),	8		
On the natural pigments of raw silk fibre of the domestic cocoon, Part X.—Relation between fluorescence colours of cocoons and that of natural pigments of the cocoons under irradiation with filtered ultraviolet light, (M. OKU),	9		
On the natural pigments of raw silk fibre of the domestic cocoon, Part XI.—Summary from Part I to Part X and discussion on some problems concerning the natural pigments of cocoons, (M. OKU),	10		
Darstellung des Harnstoffes aus Kohlensäure und Ammoniak, I. Mitteilung, (M. TOKUOKA),	12		
Studies on the digestion of food, V.—On the digestion of synthetic fats (3), (S. SUZUKI),	13		
Nutritive value of canavanin (a new amino acid), (M. OGAWA),	13		
Untersuchungen über die Enzyme von Bombyx Mori L. X. Mitteilung.—Über die Magenlipase (1), (K. YAMAFUJI and Y. YONEZAWA),	14		
Chemical studies of Japanese coccidae, VIII.—On the nitrogenous and organic substance of <i>Icerya purchasi</i> Mask, (M. KAWANO and R. MARUYAMA),	16		
Carbohydrats of the bulbs of allium, IV.—Hydrolysis of Scorodose by the enzymes, (Y. KIHARA),	16		
On the peculiar acid soil, II, (S. OSUGI, S. AOKI and S. MORITA),	17		
A systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria, (T. ASAI),	17		
Studies on the Amylase of yeast, I.—Preparation of amylase solution from pressed yeast (1), (K. ONO),	17		
Studies on the Castor-bean lipase, VI.—On the new preparation of highly active ricinus-lipase and its properties, (E.			
No. 2. February.			
Untersuchungen über die Enzyme von Bombyx mori L. XI. Mitteilung.—Über die Magenlipase, (2), (Y. YAMAFUJI und Y. YONEZAWA),	30		
Die mikrobiologische Studien über Bereitung von Sake in Taiwan, (I).—Saccharomyces Arten, (R. NAKAZAWA, Y. TAKEDA und M. SIMO),	34		
On the lecithin of yolk, (Y. YOKOHAMA),	34		
Darstellung des Harnstoffes aus Kohlensäure und Ammoniak, II. Mitteilung, II. Kapitel, Darstellung des Harnstoffes aus Ammoniumcarbamat, (M. TOKUOKA),	34		
Influence of fertilizers on the soil reaction, Part II, (C. ICHIKAWA),	36		
On the mould of soy-bean cake, (S. OTOMO),	36		
Studies on the castor-bean lipase, VII.—On the relationship between the activity of the highly active ricinus-lipase and some oxidising and reducing substance, (E. TAKAMIYA),	36		
Über die Begünstigung des Azotobakter-Wachstums durch mineralische Stoffe aus Bodenextrakten (Fortsetzung), (K. KONISHI and T. TSUGE),	37		
Studies on the assimilation of nitrites by fungi, Part I.—A new culture medium for moulds, (K. SAKAGUCHI and Y. C. Wang),	39		
No. 3. March.			
On the kephalin of yolk, (U. NISHIMOTO),	41		
On the mechanism of fermentation of arabinose by <i>aspergillus oryzae</i> , (T. TADOKORO),	41		
Darstellung des Harnstoffes aus Kohlensäure und Ammoniak, III. Mitteilung, (M. TOKUOKA),	41		
Relation of soil fertility and exchangeable acidity, (C. ICHIKAWA),	44		
A method for quantitative determination of triptophan, (T. TOMIYAMA and S. SHIGEMATSU),	44		
Food chemical studies of oats, V.—On the oils of oats produced in Hokkaido, (E.			

(TAKAHASHI, S. TASE and Y. SAEKI).....	44	cumulated from the proteins in the mulberry leaves. (Y. KISHI).....	71
On the amount of solar ultra violet rays, Part IV.—Special relation between the variations of solar ultra violet rays and the weather types. (T. HANZAWA).....	45	Studies on the constituents of the mulberry leaves, especially on the proteins, Part VIII.—On the metabolisms of the proteins in the silkworms when the quantity of the soluble carbohydrates contained in the mulberry leaves is excessively little. (Y. KISHI).....	72
Studies on the castor-bean lipase, VIII.—On the existence of a new substance in castor-seeds which has an ability of activation or retardation on the ricinuslipase corresponding to changing its form by oxidation. (E. TAKAMIYA).....	46	Studies on the constituents of the mulberry leaves, especially on the proteins, Part IX. (Y. KISHI).....	73
Studies on the constituents of mulberry leaves especially on their proteins, VIII.—On the metabolism of proteins in silk worms when the quantity of soluble carbohydrates contained in mulberry leaves is excessively little. (Y. KISHI).....	48	Studies on the constituents of the mulberry leaves, especially on the proteins, Part X.—Studies on the quantity of sericin and fibroin in the silk by the difference in the constituents of the mulberry leaves in accordance with the growth of the leaves. (Y. KISHI).....	76
Studies on the constituents of mulberry leaves especially on their Proteins, IX. (Y. KISHI).....	48	Über den Schleim von Scaphium affine pierre. (H. NAKAZAWA).....	77
Studies on the origin of the Kwanto-loam. (M. HARADA).....	48	The influence of intermittent supply of protein on the growth of albino-rats (I). (R. SASAKI and N. ANDO).....	78
Correlation between B ₁ -avitaminosis and composition of diet. (C. Y. CHEN and H. ARIYAMA).....	50	Monoamino acids of soy-bean protein. (S. SASAKI).....	78
No. 4. April.		On systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria. (Continued). (T. ASAI).....	78
Influence of deficiency of three essential elements (N, P, K) on the yield, ash-constituents (Si, Ca, P, K) and nitrogen content of unhulled rice. (C. ICHIKAWA).....	66	Further purification of biosterin and its crystalline derivative. (S. HAMANO).....	78
Polysaccharide (IX).—Über die Hydrolyse des neues Kohlenhydrats "Xyloglukuronid" und über die Isolierung des neues Disaccharids "Xyloglukuronsäurebarium". (K. NISHIDA und H. HASHIMA).....	66	On a crystalline derivative of vitamin A. (S. HAMANO).....	78
Studies on "Miso" V.—On vitamin B. (Y. SAKURAI and I. IWAMURA).....	69	No. 5. May.	
Untersuchungen über die Verwitterung der Eruptivgesteine. I.—Verwitterung der Basalte (I). (M. HARADA).....	70	Studies on "Miso". VI.—Again on the changes during ripening. (Y. SAKURAI).....	82
On the components of Shaohsing-chiu. (Y. WANG).....	70	On the chemical constituents of Kanzantiku (Arundinaria Ilindsi, Makino). (K. YOSHIMURA and I. YAMASHITA).....	82
Studies on the constituents of the mulberry leaves, especially on the proteins, Part VI.—On the difference in the quantity of synthesis among the proteins in the mulberry leaves. (Y. KISHI).....	70	Biochemical studies on "Sotetsu" the Japanese sago plant, III.—Enzyme-chemical studies on a constituents of "Sotetsu" containing formaldehyde (I). (K. NISHIDA and A. YAMADA).....	82
Studies on the constituents of the mulberry leaves, especially on the proteins, Part VII.—On the indirect causes which affect the quantity, in the silkworm and the silk, of the proteins that have been ac-		Untersuchungen von Essigbakterien aus Formosa (VI). (S. TANAKA).....	82
		Fermentation of arabinose and fucose by aspergillus oryzae, II. (T. TADOKORO).....	82
		Studies on amylosynthase XXV.—Studies on zymogen (I) Zymogen of yeast-amy-	

losynthese. (T. MINAKAWA).....	83	report). (U. TANGE).....	101
Studies on zymogen (2) Zymogen of heigher plants which accumulate starch. (T. MINAKAWA).....	83	On the relationship between the absorption of fats and their nutritive value (Preliminary report). (U. TANGE).....	101
On systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria (Continued). (T. ASAI).....	83	No. 7. July.	
Feeding experiments with haemoglobin. (S. MAEDA).....	83	Studies on a diaminoacid, Canavanin (V). —On the natural occurrence of 7-ethyliden canalin, the condensation product between canalin, and acetaldehyde during the fermentative hydrolysis of canavanin. (M. KITAGAWA, K. SAWADA and Y. HOSOKI).....	103
On the toxic components of fish liver oils. (K. KAWAKAMI and I. YAMAMOTO).....	83	Investigation on tea as to its iodine contents. (A. ITANO and Y. TSUJI).....	103
On new crystalline derivatives of vitamin A. (K. KAWAKAMI).....	85	Studies on the carbohydrates of the bulbs of Allium. V.—Carbohydrates of Allium odorum. (Y. KIHARA).....	106
No. 6. June.		Studies on the carbohydrates of the bulbs of Allium. VI.—Physicochemical properties of Scordose. (Y. KIHARA).....	106
The micro-colorimetric determination of magnesium in milk. (M. SATO and K. MURATA).....	93	Nutritive value of canavanin amino acid. (M. OGAWA).....	106
Untersuchungen von Essigbakterien aus Formosa (VI). (S. TANAKA).....	93	Investigation on the influence of ultraviolet ray on the physiological activities of azotobacter. III.—Influence of ultraviolet and single colored rays on the pigment production. (A. ITANO and A. MATSURA).....	106
Untersuchungen über die Verwitterung eruptivgesteine I—II.—Verwitterung der basalte. (M. HARADA).....	93	On the calcium-potassium law named by Ehlenberg (The first report). (Y. ISHIZUKA).....	107
Acids and alcohols as a nutrient of monascus. (K. SATO and I. NAITO).....	95	On the basaltic soils in Fukuoka prefecture. (R. KAWASHIMA).....	108
Studies on amylosynthese. XXVII.—On the amylosynthese of heigher plants which accumulate starch. (T. MINAKAWA).....	95	On the formation of azulene from the sesquiterpene alcohol of fusel oil. (T. TAIRA).....	109
Studies on amylosynthese. XXVIII.—Studies on reaction velocity. (T. MINAKAWA).....	95	Alkali soluble inorganic soil colloids. (C. ICHIKAWA).....	109
Über die neues kristallinisches Diterpen "Sciadopiten" aus dem Blatt- und Zweigöl von Sciadopitys verticillata S. et Z. I. Mitt.—Über die Eigenschaften des Sciadopitens. (K. NISEIDA und H. UOTA).....	95	Researches on hard tex boards. (M. SHIKATA and T. FUJII).....	109
On the vitamin B content of milk powder prepared by Merrelle-Soule process in Japan. (U. SUZUKI, S. HIRAO und R. IKEDA).....	101	On systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria. (Continued). (T. ASAI).....	110
On systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria. (Continued). (T. ASAI).....	101	No. 8. August.	
On the constituents of rice-embryo II.—On vitamin E in rice-embryo. (R. II, KIMM).....	101	Research on the cellulose resources. Part I. —The chemical composition of Deccan hemp and Indian mallow cultivated in Manchuria. (M. SHIKATA, K. AKAGI	
On the comparison of the nutritive value of butter and margarine (Preliminary			

and N. URANO),	120
Researches on the cellulose resources, Part II.—The properties of α -celluloses from various plants, (M. WATANABE),	120
Study on the essential oil of black tea, Part I.—The essential oil of fermented Formosan tea leaf, (R. YAMAMOTO and Y. KATO),	120
Study on the essential oil of black tea, Part II.—The essential oil of Formosan black tea, (R. YAMAMOTO and A. KATO),	122
On the amount of solar ultra violet rays (part V.)—On the weather type of the coming summer by the hypothesis of solar ultra violet rays, (T. HANZAWA),	123
Chemical studies of Japanese coccidae, IX. —On the carbohydrates and waxy substances of <i>Icerya purchasi</i> Mask, (M. KAWANO and R. MARUYAMA),	123
On the peculiar acid soil, III, (S. OSUGI, N. NISHIGAKI and M. YOSHIMI),	123
On the systematic study of alcohol and carbohydrate oxidizing bacteria isolated from fruits, and a new classification of the oxidizing bacteria, (T. ASAI),	124
Über den Synthese der α -Oxycaprinsäuren und -Aminocaprinsäuren von oxidierendem Produkts der Oelsäuren, (Y. KOBATA), ...	124
No. 9. September.	
On unsaponifiable substances especially Sterol in the Oil of "Tamari", (K. MIYAJI and M. KANEKO),	135
Enzymatic studies on the venom of snakes, Part I.—On the activation of peptidase by the venom of snake [<i>Trimeresurus mucrosquamatus</i> (Cantor)] I., (Y. TSUCHIYA),	135
Researches on viscose pulp and viscose pulp woods, Part VI.—On the microbiological decay of Japanese beech, (M. SHIKATA and I. TUTIYAMA),	136
Researches on the electrolytic reduction potential of organic compounds, Part 22. —Some consideration on the mechanism of the electrolytic reduction, (I. TACHI), ...	136
On the vitamin (A and B) of maize, (E. TAKAHASHI and G. MASUDA),	137
Studies on tea-leaves, III.—On the chemical constitution of tannin in tea-leaves, (Y. OSHIMA),	137
Studies on tea-leaves, IV.—Contribution to the knowledge on chemistry of enzymes	

in manufacturing black-tea, (Y. OSHIMA and K. HAYASHI),	138
Studies on vitamin C, XV.—The correlation between the effects of vitamin C and the method of its administration, (T. MATSUOKA),	138
On the presence of phlobaphene and "Durasantalin" among the colouring matters of the Manchurian kaoliang (<i>Andropogon sorghum</i> , Brot.), (K. OKANO and I. OHARA),	138
Eel oil (I), Fatty acid, (T. ONO),	139
Chemical studies of Chinese oil tung seed, II.—On the physico-chemical properties of a few proteins extracted from the seed of <i>Aleurites fordii</i> , (P. W. LIU),	139
On mould preventing action of α -Oxy-capric acid in "Shoyu", (Y. KOBATA),	140
Studies on the amylase of yeast, II.—On the preparation of amylase solution from dry yeast (2), (K. ONO),	140
Studies on the amylase of yeast, III.—On the preparation of amylase solution from dry yeast (3), by K. ONO,	140

No. 10. October.

Studies on the amylase of yeast, IV.—On the enzym-chemical properties (1), Optimum pH and optimum temperature, (K. ONO),	141
The relation between exchangeable acidity and exchangeable substances of soils, (C. ICHIKAWA),	141
Chemical studies on enzymes of grain, III. —On the relation between the strength of starch-liquifying enzyme of rice and the hydrogenion concentration, (G. YAMAGISHI),	141
Researches on viscose pulp and viscose pulp woods, Part, VII.—On the chemical compositions of Japanese and Manchurian birches, (M. SHIKATA and H. ONISHI), ...	141
Untersuchungen über die Schimmelpilze welche sich bei Herstellung des "Katsuo-bushi" verwendet werden, (II), (R. NAKAZAWA, Y. TAKEDA and K. SUEMATSU),	142
Die Untersuchungen über Rhizopus-arten, III, (Y. TAKEDA),	142
Studies on Manchurian kaoliang (<i>Andropogon sorghum</i> Brot.), (S. HIRAO),	142

No. 11. November.

Researches on viscose pulp and viscose pulp	
---	--

Contents

woods, Part VIII.—On the chemical composition and cooking test of Manchurian fir (<i>Abies nephrolepis</i> Maxim). (M. SHIKATA and K. TAIDOKORO),.....	154	chloride, (T. TAKAHASHI and ASAI),.....	158
Studies on vitamin C, XVII.—On the change of content of vitamin C in barley. (T. MATSUOKA),	155	No. 12. December,	
Die Untersuchungen über <i>Rhizopus</i> -arten (IV). (Y. TAKEEDA),.....	155	Digestion by intestinal enzyme.—Nutritive value of pentosan, V. (H. IWATA),.....	168
Chemical studies on enzymes of grain, IV. —On the distribution of starch-liquefing enzyme in rice grain and the effects of salts on the extraction of the enzyme, (G. YAMAGISHI),.....	155	Distribution of xylanase in the alimentary canals of higher animals.—The nutritive value of pentosan, IV. (H. IWATA),.....	168
On <i>saccharomyces</i> <i>Imodare</i> n. sp., <i>Imodare</i> yeast of bread, (S. YAMADA),	155	Chemical studies on Japanese coccidae, X. —On the nitrogenous and inorganic constituents of <i>prontopsis yanonensis</i> Kuw. (M. KAWANO and R. MARUYAMA),.....	168
Nutritive value of canavanin amino acid, (M. OGAWA),	156	Oryzanin "Antineuritic vitamin", V.—On the thermostability of oryzanin, (S. OHDAKE and T. YAMAGISHI),.....	168
Research on active carbon from Karafuto Tundra peat, Part I.—The comparison of the raw materials of active carbon, (M. SHIKATA and S. NAGANUMA),.....	157	On the influences of lime nitrogen and some of derivatives of cyanamide upon a plant growth, (S. TESIMA),.....	169
On the optical properties of the fermentation lactic acids, Part I.—The lactic acid bacteria having the special nature of causing fermentation lactic acids to form inactive, (H. KATAGIRI and K. KITAHARA),.....	157	Researches on the cellulose resources, Part IV.—Chemical composition of cotton stalk, (K. SHIMBO),.....	169
On the fermentation products of glycerine by the gluconic acid bacteria attached to fruits.—Production of dioxycetone, glyceric acid, acetic acid, glycollic acid, succinic acid and a substance which gives reddish violet color reaction by ferric		Studies on canavanin (VI), (M. KITAGAWA and A. TAKANI),	170
		Studies on the nutritive value of canavanin, (M. KITAGAWA and M. WAGA),.....	171
		Biochemical studies on "Sotetsu", the Japanese sago plant, IV.—On the emulcin of Sotetsu, (K. NISHIDA),.....	171
		On the soil formation in the north-Kyushu, (R. KAWASHIMA and T. HASEGAWA),...	171
		Relation between coagulation of protein and redoxpotential, (Y. NAKAMURA),	172
